From February 23 to March 7, 2026 (PBL period: February 24 – March 6), a joint Project-Based Learning (PBL) program was held at the AGH University of Science and Technology in Krakow, Poland. The program brought together 16 students from the Shibaura Institute of Technology (SIT) and 8 students from AGH.

Centered on the themes of energy and environmental issues, the program featured group discussions, research activities, and final presentations by students from both universities. During the presentations, participants tackled topics such as carbon utilization, evaluating and analyzing the issue from both Japanese and Polish perspectives. This facilitated highly active and engaging discussions among the students throughout the entire program.

In addition to the academic exchange, an excursion to the Wieliczka Salt Mine was organized, and interested students also visited the Auschwitz concentration camp, providing a valuable opportunity to deepen their understanding of the local history and culture.
