The Global PBL held at King Mongkut's University of Technology Thonburi (KMUTT) in Bangkok, Thailand, was conducted under the theme of "Future Crafts." In Thailand, while traditions of handmade craftsmanship and unique craft production remain alive, the government has also been promoting initiatives to sustain these cultural traditions as viable businesses and pass them on to future generations.

In the workshop, students learned about the current state of Thai craft culture and worked in mixed teams consisting of students from the participating universities. Through this group work, they developed design concepts under the theme of future crafts.
